The House of *XANVOR*

In Moradabad — the brass city, where the working of metal has passed through artisan hands for three centuries — XANVOR is a contemporary maker of fine metal handicrafts. We design, finish and assemble under one roof, then carry our work outward through export and our own retail.

Every XANVOR piece begins as raw brass, copper or sheesham and ends as an object meant to be lived with: a tray laid for a table, a bowl cradled on

rose-quartz, a copper bottle carried each day. Our workshop pairs traditional hand-hammering, embossing and engraving with disciplined modern finishing in gold, silver and enamel.

XANVOR is the house brand of *Zenko Inc.*, a registered partnership of three founders. We supply retailers, distributors and private-label buyers in India and abroad — and we welcome custom and OEM commissions.
