

XANVOR

— the binding —

IDENTITY GUIDELINES · A. ZENKO INC
COMPANY · MMXXVI

— THE BRAND

Two letters,
one gesture.
A bond
unbroken.

XANVOR draws its identity from the heart of its own name — the letters N and V, drawn as a single inseparable form. Where one stroke ends, the next begins. One gesture doing the work of two.

The Binding is a bespoke glyph — it exists in no font, no catalog, no archive. It belongs only to XANVOR.

That is the promise.

— PRIMARY MARK

The Binding

X A N V O R

— PRIMARY LOCKUP —

— CONSTRUCTION

Where N ends,
V begins.

The N's right diagonal continues into the V's left stroke — a single unbroken line doing the work of two. A brass bead marks the shared vertex.

ASPECT RATIO
10 : 7

STROKES
4 (not 6)

STEM WEIGHT
11 / 200u

APEX VERTEX
Shared · Ø 8u

— BREATHING ROOM

Give it *space.*

Minimum clear space equals the stem width of the ligature — denoted x. Nothing may enter this zone.

The *sign-off.*

— DO & DON'T

Protect *the mark.*

✓ DO · PRESERVE THE SHARED DIAGONAL

The N's right stroke IS the V's left stroke — a single unbroken line. Never break them apart.

✓ DO · KEEP THE BRASS BEAD

The bead at the shared vertex is the brand's signature punctuation mark. Always include it.

✓ DO · MAINTAIN STEM WEIGHT

The stem-to-height ratio is fixed at 11:100. Scale proportionally only.

✗ DON'T · ITALICIZE OR SLANT

The ligature is constructed upright. Slanting breaks the shared vertex geometry.

✗ DON'T · ADD OUTLINES OR STROKES

The mark is solid fill only. No stroke borders, no outline variants.

✗ DON'T · RECOLOR THE BEAD SEPARATELY

The bead must be either brass (on dark bg), rust (on light bg), or bone (on brass). Never green, blue, or any other hue.
